

# How to Make a Pacifier Clip

by [www.farmhousefabrics.com](http://www.farmhousefabrics.com)

Here at Farmhouse Fabrics we believe in simple projects and cute things. How fabulous would it be to find a tutorial that combines both of those things? Well, look no further because this pacifier clip tutorial does just that! You can make one of this sweet clips in less than ten minutes! And not only is this the easiest and fastest project ever, but this clip also makes for a great gift. Follow along to get yourself addicted to pacifier clip making. We know that we are!

Supplies:

- Ribbon
- Mitten clips
- Velcro
- Scissors
- Thread
- Sewing machine (or you can hand sew or even use a hot glue gun)

Cut a length of ribbon approximately 13 inches long. You can lengthen or shorten it as you prefer.

Fold one end of the ribbon over about an inch and stitch (or glue) it down.

Then slide your mitten clip onto the folded edge, fold the ribbon over another inch and stitch that down. This secures the mitten clip.

Next we will work on the other end of the ribbon. Fold over an inch of that side and stitch it down. Then fold it over again and stitch it down again. This is to hide your edge that would otherwise fray.

Finally, cut a piece of velcro the width of the ribbon you used and stitch that onto your folded and stitched ribbon end. Stitch the fuzzy side of the velcro an inch and a half down from the first side.

And TA-DA! There you have your clip! So easy and cute! (Or should we say SEW cute?!). Visit our website to look at our pacifier clip kits or check out our ribbons and mitten clips and make your own!
